

Snapshot of Forsyth County, Georgia

January–June 2021 Progress Report

Goals

- Improve care coordination for individuals with behavioral health needs by building a data system
- Integrate and share data via a cloud-based, high-security data platform
- Create a person-centered record and a mechanism to track interactions across health care providers and associated networks

By the Numbers

- 6 partner organizations, including NACo, Forsyth County Finance Department, United Way of Forsyth County, and Avita Community Partners, the county's behavioral health provider, helped review an online program prototype
- 21 community meetings were convened to assess data, infrastructure, system requirements and prototype demos

Success Stories

1. Finalized the data architecture and technical design of data system

2. Obtained feedback from various partners on functionality and gaps of system prototype

“As we continue to meet with our stakeholders, we are reminded just how many interactions are occurring with the very citizens our solution is designed to support. Now more than ever, the technology team and our stakeholders can see how data and technology can be another tool in the toolbox to provide necessary services to those most in need of assistance.”

--Forsyth County HCCC team member
